PROJECTS

Braille Translator [Git Repo](#) [live link](#)

This web application I made to translate normal english alphabets into braille Language. I used React js as framework and row Css to design the layout.

Password Generator [Git Repo](#) [live link](#)

This web app will generate strong passwords according to your needs. React was used to build the whole system.

QR Code App [Git Repo](#) [live link](#)

I made this Qr code application out of curiosity to learn now aspects of react js.

You can check more of my projects on my github and portfolio:
